MAESTRO SUITE
THE BEST WOOD-RELATED KNOW-HOW ALL IN ONE **SOFTWARE**

More than a half-century of experience in the woodworking industry gave birth to the Maestro Suite, a set of advanced software applications that, thanks to the forward-thinking approach of its developers, can transform great expertise and know-how into concrete and innovative woodworking solutions.

The **Maestro Suite** offers the most extensive applications library on the market, including a multitude of machining solutions. So many, in fact, that you will never need to redesign your line, and will always be ready to meet the legal requirements in all countries of the world.

The **Maestro Suite** offers the easiest programming system, allowing you to programme in a fast and intuitive way.

The Maestro Suite is most flexible: it is suitable for use with any other existing system while ensuring the highest degree of interfaceability. The **Maestro Suite** has been developed for the Universal Windows® Platform.

The Maestro Suite is the result of 65 years of experience in our industry and is the longest existing software suite dedicated to woodworking – and this is not just a number, **but historical fact.**

Work simple. Work digital

Maestro suite: expand your creativity

CNC - MACHINING CENTRES

Maestro cnc

Designing, importing and programming, management of advanced Functions for cnc machining centres and cnc drilling

ADDITIONAL FUNCTIONS

THE POWER OF MAESTRO

Maestro pro view
three-dimensional (3D) machining process simulator

Maestro 3d
three-dimensional (3D) object designing and programming

Maestro apps
functions library for simplified programming of windows, doors, escalators, furnishings

TOTAL INTEGRABILITY

Maestro msl connector
connector for third-parties with design software

SPECIALISED MACHINING

FURNITURE

Maestro setting
stand-alone and line CNC drilling machines tooling optimisation

Maestro cabinet
customised furniture design

Maestro nest
optimisation of cutting nested rectangles or free-form shapes

Maestro label
label creation and management

Maestro edge
design and programming for routing, drilling, edge banding and edge finishing

DOORS AND WINDOWS

Maestro wd
design and programming for linear and arc-shaped windows, doors and shutters

CNC - FOR TIMBER CONSTRUCTION

Maestro beam&wall

Design and programming of beams and walls

BEAM SAWS

Maestro cut

Cutting management and optimisation

ADDITIONAL FUNCTIONS

THE POWER OF MAESTRO

Maestro cut 3d editor
3D simulator machining of machining process and labels management

Maestro cut utility
library of specific machining and storage management

Maestro cut manager
simulator of machining times and report and order management

Maestro ottimo cut

Advanced cutting optimisation

EDGE BANDERS

Maestro pro edge

Linear edgebanding design and supervision

WIDE BELT SANDERS

Maestro pro sand

Advanced supervision and reporting of the sanding process

THROUGHFEED MOULDERS

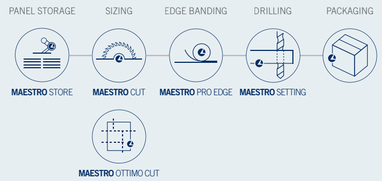

Maestro 4-side

Programming and supervision of the planing and moulding process

SYSTEMS

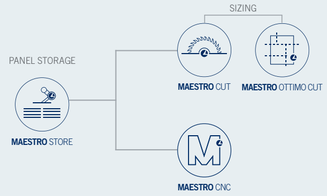

Maestro watch

Line supervision of the entire production process

Maestro store

Real-time panel storage operation and status control
