## UPGRADE FOUR-SIDE MOULDER

Currently, the trend of digital manufacturing is rapidly sweeping across various industries, and our brand-new Four-Side Moulder is undoubtedly a shining star in this revolution. This machine not only features upgrades in adjustment capabilities, including more flexible adjustments for cutter diameter and plank position but also optimized front and rear pressure plate adjustment functions, resulting in a more precise and smooth manufacturing process.

- 8,000、10,000、12,000RPM
- Interface upgrade
- Intelligent operation

**- Upgrade Four-Side Moulder**
**- Efficient, user-friendly, feature-rich, integrated interface.**

When it comes to spindle selection, we offer a variety of options. Equipped with automatic air blowing function, you can set it on the main screen to adjust the venting time according to your own usage habits.

Optional AP10 electronic digital gauge provides more precise display of duct size and rear pressure plate distance, and also introduces human-machine interface functionality.

Each spindle is equipped with an independent HMI, displaying values directly for easy adjustment. Additionally, each spindle is equipped with an independent HMI for convenient adjustment and accurate readings.
